

## **AMENDMENTS TO THE CLAIMS**

1. (Currently Amended) An e-mail sending and receiving system for sending and receiving e-mail between communication terminals, where each e-mail message is written on a Web page provided by a communication center, and each communication terminal is provided in a mobile or fixed station, the system comprising:

a mail generating section for generating an e-mail message to be sent to an addressee;

a positional data storage section for storing a plurality of ~~geographic~~ physical positional data; and

a positional data attaching section for attaching one or more of the ~~geographic~~ physical positional data stored in the positional data storage section to the e-mail message generated by the mail generating section.

2. (Currently Amended) An e-mail sending and receiving system as claimed in claim 1, wherein the positional data storage section includes a plurality of ~~geographic~~ physical positional data registered by an addresser.

3. (Currently Amended) An e-mail sending and receiving system as claimed in claim 1, wherein the positional data storage section includes a plurality of ~~geographic~~ physical positional data registered by the communication center.

4. (Original) An e-mail sending and receiving system as claimed in claim 1, wherein the mail generating section generates each e-mail message by using a format suitable for the communication terminal of the addressee, so that the communication terminal can read the e-mail message.

5. (Currently Amended) An e-mail sending and receiving system as claimed in claim 1, further comprising: a detailed data generating section for generating detailed data relating to each ~~geographic~~ physical positional data attached to the e-mail message, and attaching a URL for accessing the detailed data to the e-mail message.

6. (Original) An e-mail sending and receiving system as claimed in claim 5, further comprising: a positional data register section for storing the detailed data in the positional data storage section according to a request from the communication terminal of the addressee.

7. (Currently Amended) An e-mail sending and receiving system as claimed in claim 1, wherein the ~~geographic~~ physical positional data includes at least one of a name, a coordinate, an physical address, a phone number, a postal code, and additional data for explaining a relevant physical place.

8. (Currently Amended) An e-mail sending and receiving system as claimed in claim 1, wherein the ~~geographic~~ physical positional data is positional data on a map of a physical location.

9. (New) An e-mail sending and receiving system for sending and receiving e-mail between communication terminals, where each e-mail message is provided by a communication center, and each communication terminal is provided in a mobile or fixed station, the system comprising:

a mail generating section for generating an e-mail message to be sent to an addressee;

a positional data storage section for storing a plurality of physical positional data; and

a positional data attaching section for attaching one or more of the physical positional data stored in the positional data storage section to the e-mail message generated by the mail generating section.

10. (New) An e-mail sending and receiving system as claimed in claim 9, wherein the positional data storage section includes a plurality of physical positional data registered by an addresser.

11. (New) An e-mail sending and receiving system as claimed in claim 9, wherein the positional data storage section includes a plurality of physical positional data registered by the communication center.

12. (New) An e-mail sending and receiving system as claimed in claim 9, wherein the mail generating section generates each e-mail message by using a format suitable for the communication terminal of the addressee, so that the communication terminal can read the e-mail message.

13. (New) An e-mail sending and receiving system as claimed in claim 9, further comprising: a detailed data generating section for generating detailed data relating to each physical positional data attached to the e-mail message, and attaching a URL for accessing the detailed data to the e-mail message.

14. (New) An e-mail sending and receiving system as claimed in claim 13, further comprising: a positional data register section for storing the detailed data in the positional data storage section according to a request from the communication terminal of the addressee.

15. (New) An e-mail sending and receiving system as claimed in claim 9, wherein the physical positional data includes at least one of a name, a coordinate, a physical address, a phone number, a postal code, and additional data for explaining a relevant physical place.

16. (New) An e-mail sending and receiving system as claimed in claim 9, wherein the physical positional data is positional data on a map of a physical location.
